Re: Audio Video Repair

To Whom It May Concern:

My name is M. [redacted] Vice President of Philadelphia Suburban Development Corporation, based out of King of Prussia, PA with several properties in Philadelphia, PA and I am honored to recommend Audio Video Repair. Over the past several years, PSDC has put its trust in Audio Video Repair for all of our security, video monitoring needs. PSDC is a privately owned Commercial Real Estate Company that has been in business for over 40 years. That said we have an important need for monitoring at several of our property locations.

Specifically, PSDC has worked with M. [redacted] to install Video Monitoring systems at R [redacted] Rd., in King of Prussia & Packer Ave., in Philadelphia. The video system at our corporate office in King of Prussia allows visibility at all entrances, in the parking lot & any other location requested. We are able to monitor all locations from one computer station. The system also allows PSDC to review a history log should any security breach occur. The system at Packer Ave. is very convenient because we can monitor that location while being [redacted] minutes away from the scene. Each system is easy to use, quickly changes the screen view from one camera to another, & allows multiple vantage points at one time.

I recommend Audio Video Repair not only because of their superior equipment & customer friendly user systems, but for their customer service skills as well. Whenever PSDC has an issue AVR pays immediate attention to our need. Should we need immediate assistance and a technician is not in the office, they offer the technician's cell number for advice. When an AVR technician is on site they are polite, friendly and prompt. I personally recommend Audio Video Repair to any company that wants excellent security systems and service.

Regards,

M
