

June 2011

To Whom It May Concern:

AVR Security Systems installed a new, centralized, access control system in several buildings on our campus. They were responsive, professional and consultative at all times, and they finished the project ahead of time and as budgeted. AVR's support has been wonderful, and they have been a pleasure to work with.

They have continued to support their product, and we would recommend them as a knowledgeable, reliable, and dependable vendor.

Sincerely,

Betsy Sweeney
Administrative Director
